Who We Are?

We are a seasoned team brimming with experience, accountability, and a united desire to deliver work that satisfies the needs of the real world. In all our enterprises, we marry technical know-how with on-the-ground execution to carry projects through from planning to completion.

Our Vision

To develop a respected multi-industry conglomerate known for dependability, technical excellence, and sustained value while making positive contributions to the communities and markets we serve.

Our Mission

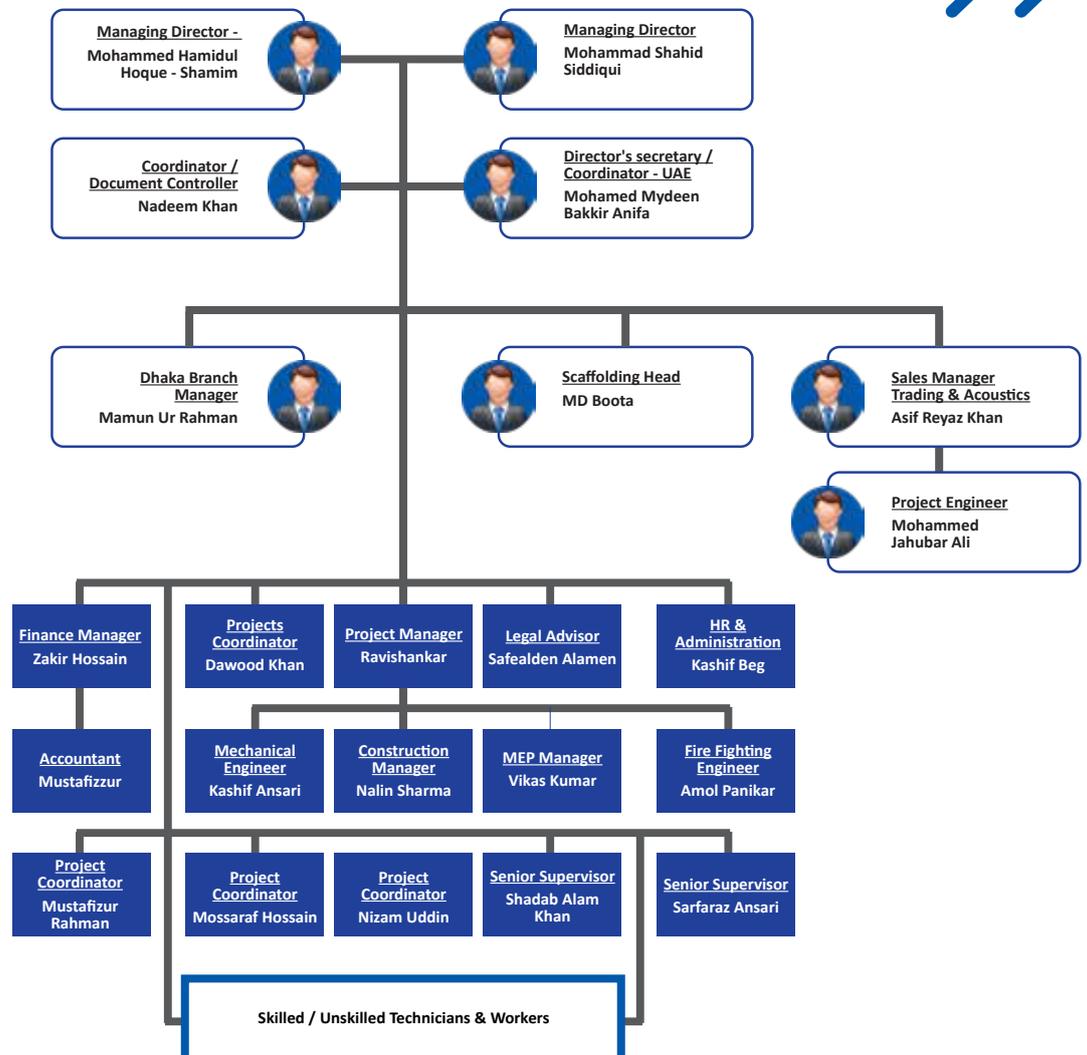

To provide superior services by means of well-disciplined execution, competent personnel, and clear methods, thus guaranteeing steady performance and enduring client relationships across all our enterprises.

Management Message

At HiRCC, accountable people, strong character, and a good cause are the foundations of successful businesses. We consider each of our projects as our responsibility rather than mere contracts. We commit to working together, using sound ethical practices, and improving continuously in order to produce outcomes that earn people's confidence and foster long-term growth.

Organization Chart

Our Commitment to Health, Safety, Environment & Quality

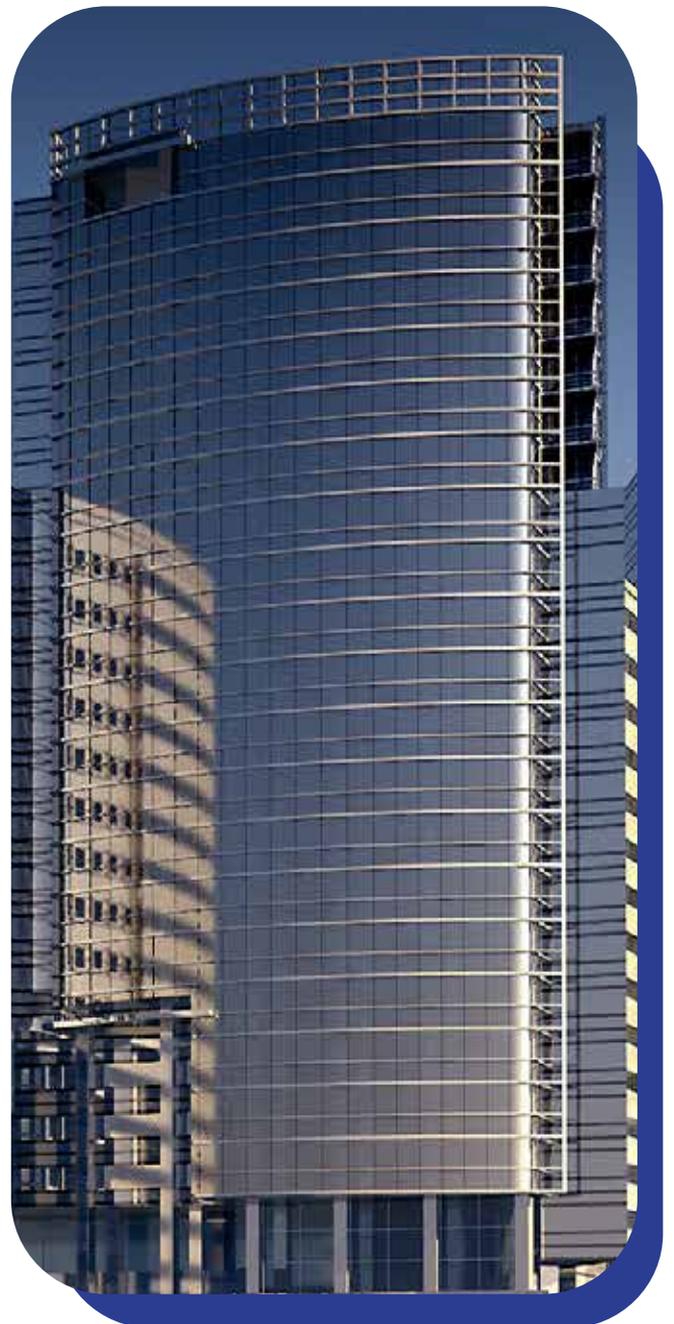

Safety and quality are not things that we simply tick off our list; they are the very core of our values. We place the well-being of our workforce and stakeholders above all else while remaining conscious of our environmental responsibilities.

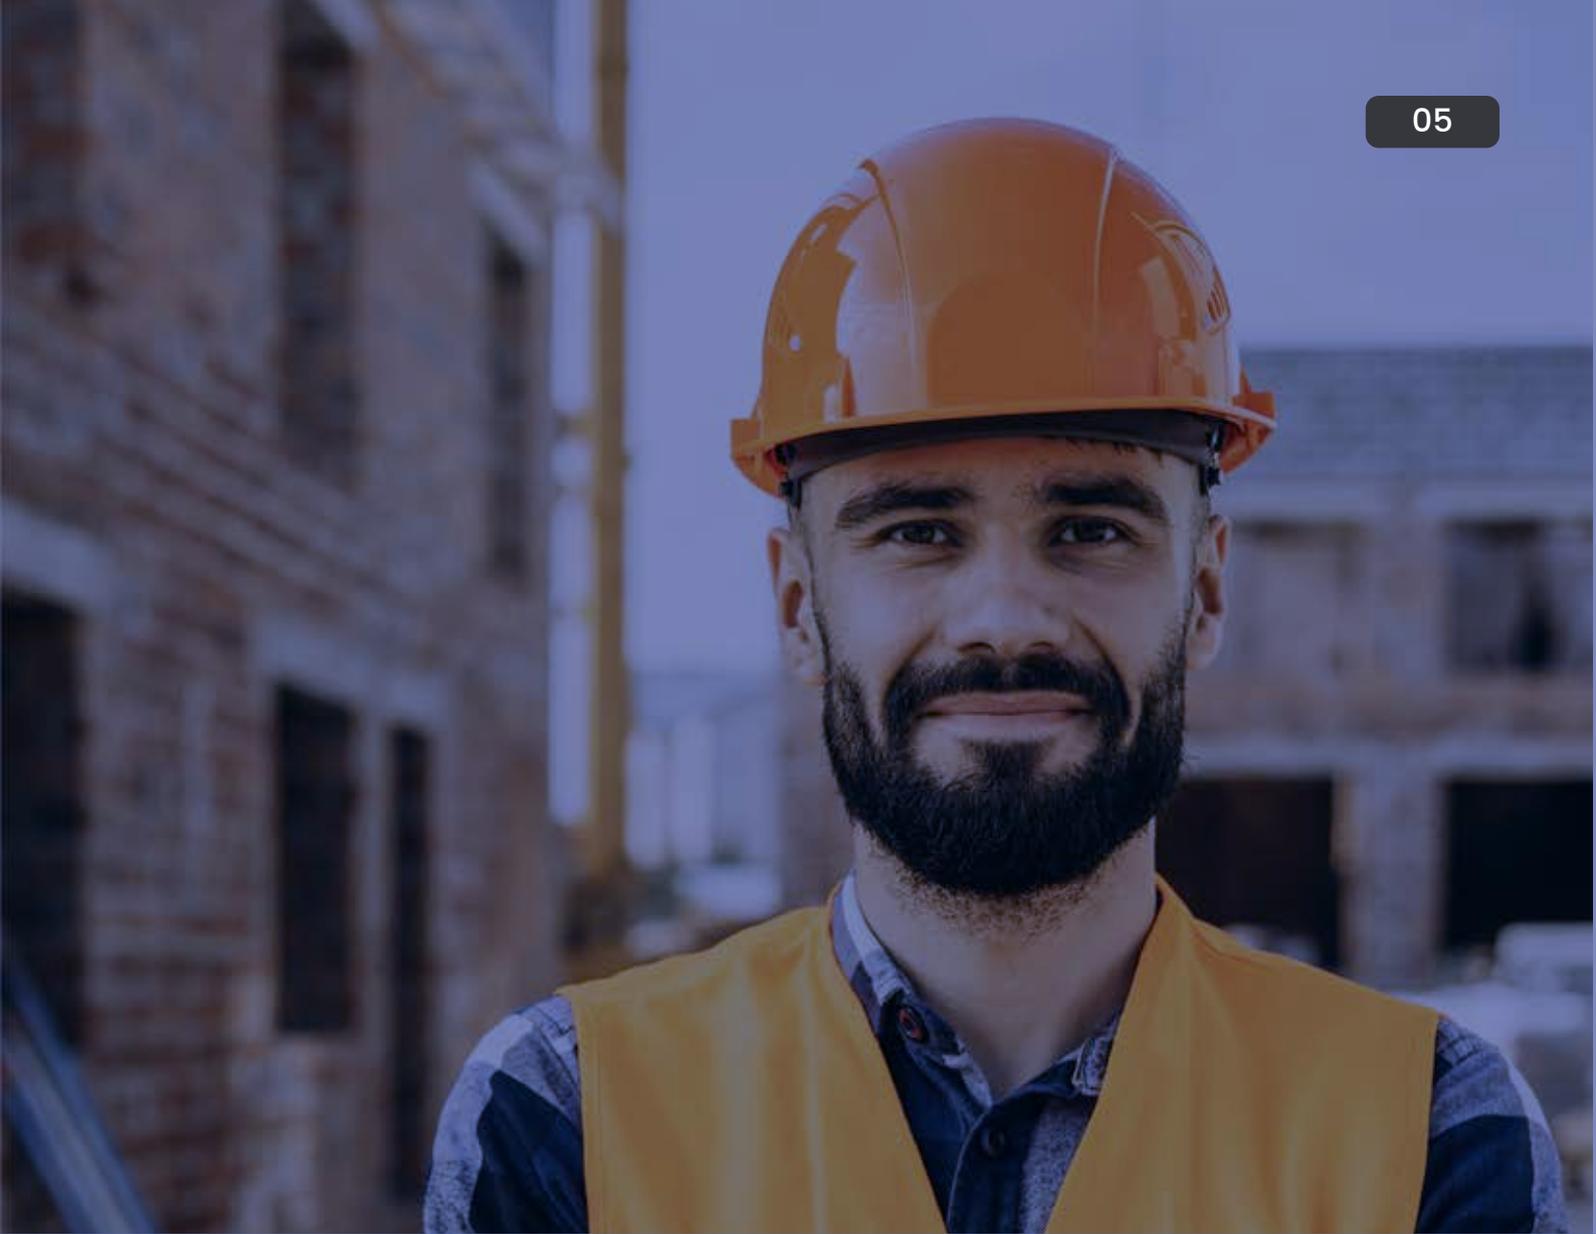

Quality Policy

- Deliver consistently high standards of workmanship and performance
- Continuously improve processes, systems, and skills
- Invest in the training and development of our workforce
- Provide every client with a reliable and world-class service

Safety First

- Ensure work environments that are safe and healthy, and in accordance with industry standards
- Encourage leadership involvement in occupational health and safety
- Protect people, equipment, and materials from preventable risks

Our Services

- Engineering, Procurement & Construction services
- MEP Works
- Facade Works
- Scaffolding Works
- Hospitality Services
- Acoustic Solution
- Trading Services
- Manufacturing
- Manpower Supply Services

01

Civil Works Services

We handle all aspects of civil engineering, from groundwork to finishing the structure. We use trusted construction methods and quality materials to keep your project safe, efficient, and within budget.

02

Mechanical Works Services

We design, install, and set up mechanical systems that are built to last and perform well. Our services are a good fit for commercial, mixed-use, and industrial projects.

03

Manpower Supply Services

We offer reliable, skilled, semi-skilled, and unskilled manpower, among them engineers, scaffolders, welders, and MEP professionals. Each resource is carefully screened for smooth project team integration.

04

Facade Works

Our facade offerings are not only visually attractive but also highly functional, such as structural glazing, cladding, and stone installations that are engineered for longevity.

05

Scaffolding Services

We offer safe, sturdy, and professionally installed scaffolding solutions, along with rental and dismantling services handled by trained specialists.

06

Supporting Services

Local purchasing, logistics coordination, and administrative support are the three components that ensure the continuous progress and smooth execution of a project.

07

Building Fit-Out & Renovation

We convert interiors from raw to fully furnished ones. We also undertake full refurbishments and structural alterations. We govern renovations with great accuracy, excellent planning, and through tight control of timelines.

08

Steel Fabrication & Welding

Thanks to our internal fabrication capabilities, we can produce tailor-made steel products for both structural and decorative purposes.

09

MEP Contracting

Our Mechanical, Electrical, and Plumbing services are designed for efficiency, durability, and energy performance, covering new installations, upgrades, and maintenance.

10

Contract & Claim Management

We interact with clients in drafting, reviewing, and negotiating contracts. Also, we provide support in resolving professional disputes or claims.

11

Infrastructure & Road Development

The infrastructure team handles the big projects, such as roads, drainage, and utility systems, with emphasis on being environmentally friendly and accurate.

12

Solar System Installations

We offer complete solar solutions to our clients from the initial planning and installation to maintenance, thereby enabling them to cut down on energy expenses and lessen their carbon footprint.

13

Trading Services

We facilitate the successful completion of projects by providing the necessary materials for construction, HVAC components, electrical & plumbing materials, and acoustic products. This is supported by an efficient procurement and logistics process.

15

Acoustic Engineering & Design Services

We offer perfect acoustic solutions from concept through completion that involve analysis, modelling, soundproofing design, and installation to enhance the comfort, privacy, and compliance aspects.

14

Food Products

HiRCC also provides a reliable supply of essential food products to support hospitality operations, catering services, and facility requirements.

- Dry fruits
- Pulses
- Sugar
- Coffee
- Spices
- Variety of grains

Aluminium & uPVC Doors and Windows Manufacturing

High Rise Construction Company Limited operates dedicated manufacturing facilities for aluminium and uPVC doors and window systems, offering reliable, project-ready solutions for modern construction.

Aluminium Systems:

Our aluminium unit produces doors, windows, mullions, and transoms designed for strength, durability, and clean architectural finishes. These systems are ideal for high-rise, commercial, and façade applications where performance and precision matter.

- Strong, lightweight structures
- Precision-fabricated mullion and transom systems
- Weather-resistant and long-lasting
- Custom-built to project requirements

uPVC Systems

Our uPVC facility manufactures doors and windows focused on comfort, insulation, and low maintenance. These systems are well suited for residential and mixed-use developments.

- Thermal and sound insulation
- Moisture and corrosion resistance
- Low maintenance and smooth operation
- Custom sizing and designs
